Key Vocabulary	Interpreting Data	Pie Charts																																					
bar chart	Information can be show in tables, charts or graphs. Interpreting data simply means understanding or working out what is being shown by a table, graph or chart and being able to answer questions about that information.	Pie charts represent discrete data.																																					
pictogram		A circle is divided into segments, where each segment represents a data category. The size of each segment matches its proportion of the total amount.																																					
frequency table																																							
tally chart																																							
pie chart	Line Graph																																						
discrete data	Line graphs are used to show changes to a measurement over time. Data shown in a line graph is continuous. Sets of points are joined together to make the line. A line graph to show the length of shadows over time  <table border="1"><caption>Shadow Length Data</caption><thead><tr><th>Time</th><th>April (cm)</th><th>May (cm)</th></tr></thead><tbody><tr><td>09:00</td><td>60</td><td>50</td></tr><tr><td>10:00</td><td>40</td><td>30</td></tr><tr><td>11:00</td><td>35</td><td>15</td></tr><tr><td>12:00</td><td>25</td><td>10</td></tr><tr><td>13:00</td><td>35</td><td>10</td></tr><tr><td>14:00</td><td>45</td><td>35</td></tr><tr><td>15pm</td><td>55</td><td>45</td></tr><tr><td>16pm</td><td>60</td><td>50</td></tr></tbody></table>	Time	April (cm)	May (cm)	09:00	60	50	10:00	40	30	11:00	35	15	12:00	25	10	13:00	35	10	14:00	45	35	15pm	55	45	16pm	60	50	A pie chart to show children's favourite sports  <table border="1"><caption>Sports Favourite Data</caption><thead><tr><th>Sport</th><th>Children</th></tr></thead><tbody><tr><td>swimming</td><td>12</td></tr><tr><td>netball</td><td>6</td></tr><tr><td>football</td><td>3</td></tr><tr><td>gymnastics</td><td>3</td></tr></tbody></table>	Sport	Children	swimming	12	netball	6	football	3	gymnastics	3

Statistics

Bar Chart

A bar chart has a horizontal axis and a vertical axis. Bars show the data value of each category. There must be a gap between each bar. The scale of the bar chart is chosen based on the data range.

Pictogram

This graph uses pictures or symbols to represent the data. The pictogram uses one picture or symbol to represent a value.

Frequency Table

Eye Colour	Tally	Frequency
brown		6
blue		8
green		3
grey		4
hazel		5

Tally marks are used to help count things. Each vertical line represents one unit. The fifth tally mark goes down across the first four to make it easier to count.

The frequency column is completed after all the data has been collected.

Mean Average

The mean is the average of a set of data.

To find the mean or average, add up all of the values to find the total. Divide the total by the number of values that you added together. This will give you the mean.

12	15	10	8	15
----	----	----	---	----

$$12 + 15 + 10 + 8 + 15 = 60$$

$$60 \div 5 = 12$$

The mean of this data is 12.
